SUMMARY

I am a Fullstack Software Engineer with strong experience in backend and frontend development, specializing in Node.js, NestJS, React, Next.js, MongoDB, and PostgreSQL. I have 4+ years of experience in SCADA and industrial automation at PT Bio Farma and PT PANNA BALI, with skills in instrumentation, PLC, and AutoCAD. My combined expertise in industrial systems and modern web technologies allows me to build scalable applications and integrate software with real-world engineering processes.

PROJECT EXPERIENCES

deShoper – E-Commerce Website

Developed a functional online store featuring product listing, shopping cart, user authentication, and purchase flow. Built with Next.js, Tailwind CSS, and backend services with Nestjs.

SaGames – Mini Game Web App

Developed responsive web design using HTML, CSS, and Vanilla JavaScript to ensure accessibility across different devices. The web have features a collection of interactive JavaScript mini games, including Rock Paper Scissors, Memory Pokémon, Fast Clicker, and Avoid the Falling Object. Also built user profile functionality and basic scoring systems to enhance user interaction and encourage replayability.

SCADA System for Oven Heater and Heater Dryer

built a comprehensive SCADA (Supervisory Control and Data Acquisition) system to control and monitor an Oven Heater and Tea Leaf Dryer plant. Utilized the ADAM-6015 module to collect analog input from temperature sensors and the ADAM-6060 module for digital output to control relays and actuators. Developed an interactive Human Machine Interface (HMI) that enables real-time visualization, monitoring, and control of plant operations.

Tsunami Wave Detector (Final Project Polban)

Designed and developed an IoT-based tsunami early warning system capable of detecting abnormal sea wave activity and automatically broadcasting real-time alerts via Twitter using cloud-based APIs. The system used microcontroller-based sensors to continuously monitor wave height, transmitting data to a cloud server for analysis.

WORK EXPERIENCE

PT BIO FARMA

2020 - 2024

- Performing control and monitoring pressure vessel tank processes during production.
- Disinfect, Clean in Place and Sterilize Pressure Vessel Tank before using production.
- Review data disinfect, Clean in Place, sterilize and processes production pressure vessel tank.
- Conducting initial troubleshooting using an machine pressure vessel tank, and SCADA pressure vessel tank.
- Conducting preventive maintenance on pressure vessel tank.
- Compiling and preparing production document requirements.

PT PANNA BALI

2018

- Installing a device tracker and IoT.
 - Creating a security system that is RFID Door Lock System.
 - Install the current sensor to the ADC module.
 - Installing the ADC module to Raspbery.
 - Analyzes the step counter program for the counter footsteps.
-

EDUCATION

Fullstack Web Development Program

2025

REVOU (Bootcamp)

- Learned full-stack Software Engineering program. I have hands-on experience with HTML, CSS, JavaScript, TypeScript, TailwindCSS, React, Next.js, NestJS and backend development using Node.js, RESTful APIs.

Bachelor Of Industrial Engineering

2022 - 2024

BINUS UNIVERSITY

- GPA: 3.83 / 4.0
- Thesis: Optimization Analysis Of Vessel Cooling Time To Prevent nOPV2 Vaccine Deviation Using Linear Regression And Factorial DOE At PT Biofarma

Associate Degree of Electronics Engineering

2016 - 2019

Bandung State polytechnic

- GPA: 3.16 / 4.0
 - Final Project: Tsunami Wave Detection System Based on IoT
-

SKILLS

- **Technical Skills:** SCADA (Supervisory Control and Data Acquisition), PID Tuning, PLC (Programmable Logic Control), Design Electronics Circuit, Microcontroller, HTML, CSS, JavaScript, TypeScript, TailwindCSS, React, Next.js, NestJs, Node.js
 - **Soft Skills:** Communication, Team Collaboration, Problem Solving, Time Management
 - **Languages:** Indonesia, English
 - **Certificate:** Indonesian Electric Car Competition, Practical Work at PT PANNA BALI, Electronics Student Associate, SCADA system Laboratory
-

ORGANIZATION EXPERIENCE

ELECTRONICS STUDENT ASSOCIATE

- Member (2016 - 2019)
- Staff Commission Communication and Information (2017 - 2018)

ROBOTICS

- Member (2016 - 2018)
-
